PROJECT

Spotstar

Personal Project | 2024 - Present
https://myspotstar.netlify.app/

- A combination of SpotStar would create a comprehensive entertainment platform offering both music streaming and video content.
- It could provide users with access to vast libraries of music and movies creating an digital entertainment service.

Weather Application

Personal Project | 2024 - Present
https://weatheryusuf.netlify.app/

- Integrated API (such as OpenWeatherMap) to fetch real-time weather data for various locations. Implemented dynamic updates for current conditions, including temperature, humidity, wind speed, and weather icons.
- Designed a clean, responsive user interface using React.js, ensuring optimal display across devices (mobile, tablet, and desktop). The layout automatically adjusts based on screen size for better user experience.
- Implemented location search with autocomplete feature, allowing users to easily search for cities or regions to get weather updates.

SOFT SKILS

- Communication: Effective communication to facilitate collaboration and understanding
- Teamwork: Strong team player with a history of successful group contributions.
